NEW PPRNET RESEARCH IN OPIOID SAFETY

Andrea Wessell, PharmD
Plan for what comes next

- Future PPRNet Med Safety research
NEXT STEPS FOR PPRNET OPIOID RESEARCH

HHS 5-POINT STRATEGY TO COMBAT THE OPIOID CRISIS

MORE ADDICTION PREVENTION, TREATMENT, AND RECOVERY SERVICES

BETTER PAIN TREATMENT

MORE OVERDOSE REVERSERS

BETTER DATA

BETTER RESEARCH

©PPRNet 2017
FUTURE PPRNET OPIOID PROJECTS

• Judicious prescribing in chronic non-cancer pain
  – Best practices from CDC, MS-TRIP 3
  – More specific prescribing outcomes

• Managing high risk primary care patients on opioids
  – Tapering approaches, engaging patients
  – Use of naloxone
  – Treatment/referral of opioid use disorders
O-TRIP, MS-TRIP 4, PAIN-TRIP, ACRONYM TBA

- January 2018 submission
- “Advancing Patient Safety Implementation through Safe Medication Use Research (R18)”
- Advance MS-TRIP 3 lessons + new CDC guidelines using practice-based intervention
OPIOID “TOOLKIT”

- Evidence-based prescribing guidelines
- Population management tools
- Clinical decision support
- Patient education tools
TRANSLATING OVERDOSE PREVENTION INTO PRACTICE

- June 2018 small/exploratory grant

- Identify best practices in implementing naloxone prevention rx for high risk patients

- “…innovative approaches to identifying, understanding, and developing strategies for overcoming barriers to the adoption, adaptation, integration, scale-up and sustainability of evidence-based interventions, tools, policies, and guidelines”
TRANSLATING OVERDOSE PREVENTION INTO PRACTICE

- How does community-based use of naloxone evidence translate into primary care practice?
  - Small group of practices with interest in rx for patients at high risk of unintentional overdose
  - Develop best practices for who, what, when, how
  - Explore potential impact on dosing, other high risk rx, managing substance use disorder
DISCUSSION

- What are you interested in? Why?

- Suggestions for other medication safety issues?
