Block 4: 9/25/17 – 10/20/17	2	Block 7A: 1/2/18 – 1/12/18		Block 10B: 4/9/18 – 4/20/18	

Does this rotation accept visiting students? YES NO

COURSE DESCRIPTION:

The course consists of 18 eight-hour shifts at the Masindi-Kitara Medical Center (MKMC) in Masindi, Uganda. During each shift, the student will interact with patients and learn how to perform a focused H&P. The student will focus on how to order appropriate diagnostic tests and formulate a differential diagnosis while focusing on the many limitations of medical care in the developing world. The student will work closely with the attending on duty and learn how to treat and manage many various illnesses and injuries including tropical diseases. The MKMC Medical Center in Uganda operates 24 hours a day, 7 days a week and sees over 2,000 patients a month on average. The student will have the opportunity to work in Emergency and Urgent care, inpatient care, outpatient clinical care, OB/GYN care, and surgical care. Furthermore, the student will have the opportunity to participate in laboratory diagnostics as well as ultrasound performance and interpretation. If the rotation falls during one of four PMI short-term mission teams to Uganda, the student will have the opportunity to join the team in remote mobile clinic locations.

LEARNING GOALS & OBJECTIVES: At the completion of this clinical rotation students should be able to do the following:

1. Conduct an initial assessment of a patient in the developing world and perform stabilization techniques. (PC1, PC7, CS1, CS2, PR1)
2. Establish a differential diagnosis including potential tropical diseases, zoonotic diseases, and diseases related to inadequate public health and order/interpret appropriate diagnostic tests (including imaging/lab studies) related to the differential diagnosis. (MK3, PC2)
3. Manage acutely ill and/or injured patients as well as inpatients. (MK3, PC3, PC5, PC6, CS1, CS2, PR3)
4. Perform procedural skills if desired (i.e., I.V. access, blood drawing, sutures, I&Ds, wound care, fracture splinting). (PC7)
5. Participation/reading blood smears, lab interpretation, ultrasound interpretation, and patient case discussions. (MK5, MK8, PL3, IP3)
6. Develop an understanding of the differences in the healthcare systems in Uganda and the U.S. (SL1, SL3, SL4, SL)

INSTRUCTIONAL METHODOLOGIES AND ROTATION ACTIVITIES: Students on this rotation will be expected to learn and achieve the educational goals and objectives through the following methodologies and activities:

1. Lectures, rounds, and discussion including two pre-trip lectures of 1 hour each and one post-trip lecture of 1-2 hours including a post-rotation debriefing session with course director.
2. Patient contact and patient load.

PATIENT ENCOUNTERS: Students will be expected to work-up patients with conditions from all organ systems, including:

1. Malaria, Typhoid and other Tropical or Infectious Diseases common to the area.
2. Chest pain, abdominal pain, diabetes, hypertension, cellulitis, trauma, and non-infectious diseases.

EVALUATION / FEEDBACK METHODS: Students will be evaluated using the following methods.

1. Clinical Performance Evaluation.
2. Direct observation of clinical and patient care skills evaluated by the attending physician.
3. The students will be evaluated on their ability to follow the patient through the course of their time at MKMC, which could include an admission.
4. Active participation in group discussion as evaluated by the attending physicians or MKMC staff.
5. Participation in weekly didactic sessions evaluated by the course director.
6. The student will be required to present a case report or original paper of their choosing during one didactic session – duration of no more than five minutes – and will be evaluated by their peers, residents, and faculty present.

7. In order to continue to improve the rotation, the student will be required to critique both the course and the attendings, residents, and/or MKMC staff with whom s/he worked. These evaluations need to be completed no later than two weeks after the completion of the rotation.

Will students be expected to participate in call? YES NO

ADDITIONAL INFORMATION: This course requires the following

1. Approval by the COM Associate Dean for Curriculum – Clinical Sciences and the COM Selectives and Electives Committee.

Permission to participate in this elective may be denied or revoked after original permission is granted if for any reason concerns arise regarding safety or quality of the educational experience.

2. Coordination of travel with the MUSC Center for Global Health and adherence to the MUSC International Travel Policy and restrictions, which includes:

- a. [Registration of travel](#) with International SOS, the university international travel assistance provider
- b. Completed [Health and Safety Plan](#)
- c. Completed [International Travel Waiver](#)

3. Completion of a separate application and waiver of liability prior to departure through OneWorld Health, which serves as host during the rotation. This can be found at www.oneworldhealth.com.

4. Vaccines are required for travel into Uganda; please see the CDC website on travelers' health and/or visit the MUSC Travel Medicine Clinic for more details.

Funding may be available to cover costs associated with this elective, please see your COM Deans Office Representative for details.
