MUSC Head & Neck Tumor Center
Department of Otolaryngology - Head & Neck Surgery

32nd Annual F. Johnson Putney Lectureship in Head & Neck Cancer
Friday, December 8, 2017

MUSC Hollings Cancer Center, 86 Jonathan Lucas Street, Room 120
– Parking will be available at the Jonathan Lucas Street Garage –

10:45-11:00 a.m. Lunch; network with our exhibitors
11:00-11:10 a.m. Welcome and Introduction ................................................................. Terry A. Day, M.D.
11:10-11:40 a.m. The Changing Role of the Surgeon: Leading the Transformation of Health Care Systems ........................................... Jonathan M. Irish, M.D., MSc, FRCSC, FACS
11:40-11:45 a.m. Intro to Research Presentations ......................................................... David M. Neskey, M.D.
11:45-12:05 p.m. Family-Centered Survivorship Care for Head and Neck Cancer Patients and Their Caregivers ................................................................. Katherine R. Sterba, Ph.D.
12:05-12:25 p.m. Improving the Timeliness and Equity of Adjuvant Therapy Following Surgery for Head and Neck Cancer .................................................. Evan M. Graboyes, M.D.
12:25-12:45 p.m. What’s New in Treating Nicotine Addiction: from Pills to Policy ................................................................. K. Michael Cummings, Ph.D. MPH
12:45-1:00 p.m. Using national Databases for Outcomes Research in Head and Neck Cancer: The Good, the Bad and the Ugly ................................................ Eric J. Lentsch, M.D.
1:00-1:30 p.m. Tracheostomy and Laryngectomy Safety Programs in Adults ................................................................. Brian Nussenbaum, M.D.
1:30-1:45 p.m. Phase II trial of Nivolumab as a Novel Neoadjuvant Presurgical Therapy for patients with Locally Advanced Oral Cavity Cancer, an Initial Update ................................................................. David M. Neskey, M.D.
1:45-2:00 p.m. BREAK, HN Team photo in the Healing Garden
2:00-2:45 p.m. 32nd Annual F. Johnson Putney Lectureship in Head & Neck Cancer:
Taking off Our Loupes and Looking Ahead: The Vision of Surgery in 20/20 ................................................................. Jonathan M. Irish, M.D., MSc, FRCSC, FACS
2:45-3:00 p.m. Award Presentations
3:00 p.m. Adjourn - Please submit all CME forms to the registration desk, Thank you!

F. Johnson Putney Reception
Friday, December 8, 2017 | 5:00 to 8:00 p.m. | 45 Waterside on Lockwood

*** RSVP Required by December 1, 2017 ***
Come early to catch the sunset over the Charleston Harbor!
Hilton Garden Inn Charleston Waterfront / Downtown’s Premier Rooftop Venue
45 Lockwood Drive, Charleston, South Carolina, 29401
Learning Objectives  At the end of this course the participant should be better able to:

• conclude that the development of new technologies may enable increasing minimal access approaches and surgical treatments.
• evaluate varied models of survivorship care and their implications for head and neck cancer care delivery.
• outline patient, family and systems-level factors important to quality survivorship care in head and neck cancer.
• understand the frequency, causes, and consequences of delays in postoperative radiation therapy following surgery for head and neck cancer as well as strategies to improve the timeliness and equity of care.
• summarize the stop smoking treatment at MUSC.
• identify the emerging nicotine dependence treatments and the evolving marketplace of recreational nicotine products and their implications for smoking cessation.
• outline the FDAs efforts to regulate tobacco products.
• interpret how national databases can be used, or misused, in the study of the epidemiology and outcomes of head and neck cancer.
• to outline why patients with tracheostomies and laryngectomies are high risk populations for adverse events during and after hospitalization.
• perform an analysis of their own safety programs for patients with tracheostomies and laryngectomies.
• apply principles of safety and quality improvement science to improve care for patients with tracheostomies and laryngectomies.
• demonstrate the feasibility of Nivolumab as neoadjuvant presurgical therapy for patients with oral cancer.
• outline the challenges that health care systems face in delivering high quality, cost-efficient care.
• relate to the importance of engaging in health care system change management.
• assess the benefits that the physician leader can provide to the management of our ever-changing health care systems.

| Reservation & RSVP Required --- by 12/1/17 |
| --- For easy online registration please go to: musc.edu/ent/cme |
