The Medical University of South Carolina
Department of Otolaryngology - Head & Neck Surgery
presents the 4th Annual
Charleston
Pediatric ENT Update

February 11, 2017
Courtyard Marriott Charleston Historic District
Course Director: David R. White, M.D.
Associate Professor, Director, Pediatric Otolaryngology
The fourth annual *Charleston Pediatric ENT Update* is a comprehensive full day course designed to provide otolaryngologists, pediatricians, and family practitioners with up-to-date guidelines to implement in their daily practice, promote quality and efficient care, and tackle challenging ENT diagnoses with confidence.

### Course Objective

Upon completion of this course the participant should be able to better examine and justify regional and institutional variations in standards of care for children with vascular malformations, obstructive sleep apnea, and hearing loss.

7:30–8:00 am  Registration & Breakfast, network with Exhibitors

8:00–8:05 am  Welcome ........................................................................................................David R. White, M.D.

8:05-8:25 am  Post-tonsillectomy Hemorrhage in Children: Minimizing Risk ................Sharon H. Gnagi, M.D.
Participant should be better able to utilize methods to minimize post operative bleeding after tonsillectomy.

8:25-8:45 am  Intracapsular Tonsillectomy: Advantages and Contraindications ................................................Christopher M. Discolo, M.D., MSCR
Participant should be better able to compare the advantages of intracapsular tonsillectomy to traditional tonsil surgery.

8:45-9:05 am  Tonsillectomy in Children with Down Syndrome: What Do We Know? ..................................................David R. White, M.D.
Participant should be better able to interpret the utility and limitations of tonsillectomy for treatment of obstructive sleep apnea in children with Down syndrome.

9:05-10:05 am  Drug Induced Sleep Endoscopy in Children with Obstructive Sleep Apnea ..................................................Sanjay R. Parikh, M.D.
Participant should be better able to apply indications and systematic analysis of pediatric sleep endoscopy.

10:05-10:20 am  Q&A

10:20-10:35 am  Break, networking with exhibitors

10:35-11:05 am  Current Treatment of Hemangiomas........................................Krishna G. Patel, M.D., Ph.D.
Participants should be able to assess the role of propranolol in the treatment of infantile hemangiomas.

11:05-11:35 am  Diagnosis and Sclerotherapy for Vascular Anomalies............M. Imran Chaudry, M.D.
Participant should be better able to compare the differences in the vascular anomalies and the benefit of sclerotherapy in the management of these lesions.

11:35-11:50 am  Q&A

11:50-12:00 pm  Break, networking with exhibitors

12:00-1:00 pm  Learning Lunch with the Faculty - 3 break out groups:
1.) Vascular Malformations  2.) Obstructive Sleep Apnea  3.) Hearing Loss

1:00-1:30 pm  Pediatric Chronic Rhinosinusitis Guidelines ............................Sanjay R. Parikh, M.D.
Participant should be better able to interpret current guidelines for the treatment of both acute and chronic sinusitis in children.

1:30-2:00 pm  Audiograms and ear tubes: when is a hearing test necessary? .................................................................Clarice S. Clemmens, M..D.
Participant should be better able to apply current guidelines and interpret recent research regarding the need for pre- and post-operative audiograms in pediatric patients undergoing tympanostomy tubes.

2:00-2:15 pm  Q&A

2:15-2:30 pm  Break, networking with exhibitors

2:30-3:00 pm  Imaging for Congenital Sensorineural Hearing Loss: Changing Trends .........................................................David R. White, M.D.
Participant should be better able to justify the need for MRI evaluation of the internal auditory canals when no neural response is seen on ABR testing.

3:00-3:30 pm  Evolving Indications for Cochlear Implantation in Children. Meredith A. Holcomb, AuD
Participant should be better able to examine various ways that audiometric test measures are being modified in present day clinics to determine candidacy for a cochlear implant.

3:30-3:45 pm  Q&A

3:45 pm  Adjourn  Complete and submit all CME forms - Thank you!
As the premier children’s hospital in South Carolina, MUSC Children’s Hospital offers patients and their families:
- Exceptional medical care
- Cutting-edge procedures and research
- State-of-the-art technologies and facilities
- Unparalleled specialty and subspecialty care
- Outreach programs and resources for patients, families and the community at-large

We are committed to providing individualized quality care for every child, delivered in ways that are psychologically sound, developmentally appropriate, family-centered and proven by research.
