

## E\*Value Statement on Confidentiality

The Medical University of South Carolina is committed to providing a high quality educational environment that strives to continually improve. Toward that end, MUSC has adopted E\*Value to administer course and instructor assessments. This course and instructor assessment system is designed to provide MUSC students with the opportunity to provide feedback on every course and instructor at MUSC.

MUSC values confidentiality and to that end, is committed to maintain student confidentiality throughout the course and instructor evaluation process. The E\*Value system ensures confidentiality by maintaining all data off-site with the vendor (Advanced Informatics). The only information received by MUSC will be de-identified responses, and summary reports.

The only circumstance where confidentiality will be breached within MUSC is when an individual response highlights a significant safety or ethical issue. In the event of a significant safety or ethical issue, the break of confidentiality may only be requested to the vendor by a written request from the Vice President for Academic Affairs or the President of the Medical University of South Carolina.
