Macintosh Laptop Wireless Printing Instructions

Installing the Printer Driver

Before you set up the printers you may need to install the HP driver software from hp.com at this link: http://www8.hp.com/us/en/drivers.html

If that link is not found, go to HP’s website and search for driver downloads.

- Enter the model of the corresponding printer from this list:

5) Click Add Printer or Scanner

6) Click the IP icon along the top.

- The address is goprint-sw.library.musc.edu
- Protocol is Line Printer Daemon – LPD.
- Consult the printer list above for the Queue field.
- You can also use the Queue for the Name field or use something more descriptive.
- For the Use box, you can either use Auto Select or Select Printer Software. Some printer features may not be available under Auto Select. If you choose Auto Select, click Add, and go to last step.
If you click, **Select Printer Software**, type in the model number in the search box or scroll through the list. Click on the model and then click **OK**.

The printer will be set up and then a list of available options will be displayed. Make sure the box for **Duplex Unit** is checked. All of the printers have duplex capabilities. Click **OK**.

7) **You are ready to print.**

8) When you print something, the name of your computer will appear on the GoPrint server.
