Mission and Goals

Conduct primary care research, health services research, QI/ patient safety research, comparative effectiveness research, and/or research in medical education.

Teach research presentation and manuscript writing skills.

Master thesis is a completed grant proposal to an active RFP.

Provide care to diverse groups of patients both directly as providers and through supervision of trainees in clinical settings.

Serve as role models and mentors with a goal of promoting academic generalist and hospitalist careers.

Fellowship Faculty

William T. Basco, Jr., MD, MS
Co-Director, Director of General Pediatrics

William P. Moran, MD, MS
Co-Director, Director of General Internal Medicine and Geriatrics

Vanessa A. Diaz, MD
Co-Director, Department of Family Medicine

Annie Andrews, MD, MSCR

David Bundy, MD, MPH

Leonard Egede, MD, MSCR

Cara Litvin, MD, MSCR

Eric M. Matheson, MD, MS

James Roberts, MD, MPH

Kit Simpson, DrPH

Terry Steyer, MD

Ron Teufel, MD, MSCR

Andrea Wessell, PharmD

Fellowship Opportunities

Academic Generalist and Hospitalist Fellowship Programs to prepare Physicians for Careers in academic settings, in General Pediatrics, General Internal Medicine and Geriatrics, Family Medicine and academic hospital medicine in any of those specialties.

A two (optional three) year program designed to prepare residency program graduates for productive academic careers. Each Fellow earns a Master of Public Health degree. Clinical work will be within the specialty of the fellow, while classes seminars, journal club, research training and other common elements are shared.

Fellowship time is structured as primarily research and academic training, with clinical time according to future practice specialty. Non-clinicians devote 100% of their time to research. Research opportunities may include, but are not limited to, practice-based research networks, patient-centered outcomes research, comparative effectiveness research, clinical trials, patient safety, health information technology, health care disparities, and large database methods.
