MUSC Psychiatry
Chair Update
June 2015

Thomas W. Uhde, MD
Department of Psychiatry and
Behavioral Sciences &
Institute of Psychiatry
Dr. Megan Moran-Santa Maria is an Assistant Professor in the Addiction Sciences Division at MUSC. She is a translational researcher with extensive experience in both preclinical and clinical research. She earned her Masters of Science Degree in Biology from San Jose State University while studying the effects of gravitational load on endocrine markers of metabolism at the National Aeronautics and Space Administration (NASA) at Moffett Field, California. Dr. Moran-Santa Maria received her PhD in Neurosciences from MUSC in 2006. She received a pre-doctoral (F31) fellowship from the National Institute on Drug Abuse (NIDA). Dr. Moran-Santa Maria’s pre-doctoral training focused on N-Acetylcysteine modulation of glutamate transmission in animal models of drug withdrawal and relapse. Prior to that, she completed her undergraduate studies at the University of Arizona. Her primary research interest is focused on the neurobiologic factors that regulate emotion and how dysregulation in these systems contribute to the development and maintenance of psychiatric disorders.

Dr. Moran-Santa Maria began conducting clinical research during her NIDA T32 post-doctoral fellowship at MUSC in 2007. Since that time she has developed expertise in the conduct of human laboratory paradigms, in particular cue- and stress-reactivity tasks, and neuroimaging. Dr. Moran Santa-Maria is a former K12 BIRCWH Scholar at MUSC and PI of a NIMH-funded R21 exploring gender differences in the neural correlates of PTSD. She is currently PI of a five-year, NIDA-funded R01 examining the effect of intranasal oxytocin on the neural substrates of social stress in cocaine-dependent individuals. In addition, she is a Co-I on seven other federally-funded projects focused on addiction.

Dr. Moran-Santa Maria has over 30 peer-reviewed publications and she has been the recipient of numerous awards, including the American College of Neuropsychopharmacology Travel Award and the College of Problems on Drug Dependence Travel Award. She is a member of the American Physiological Society, Federation of American Societies of Experimental Biology, Society for Neurosciences, College on Problems of Drug Dependence and the American Psychological Association.
traits that predict depression under conditions of stress. To date, the study has enrolled over 7,000 subjects from 20 academic institutions across the country and provides a unique opportunity for her to investigate sex and gender differences in depression.

Dr. Guille came to MUSC in 2009 and completed formal research training via a postdoctoral research fellowship at the National Crime Victims Research and Treatment Center and obtained a Masters in Science and Clinical Research. In 2011, she was awarded a career development award, Building Interdisciplinary Research Careers in Women’s Health (BIRCWH-K12) focused on peripartum mental health. Her research and clinical work with peripartum women revealed a growing problem with prescription opioid use and lead to a recently funded career development award (K23) from the National Institute on Drug Abuse focused on behavioral interventions to reduce the use, misuse and abuse of prescription opioid medications during pregnancy.

Dr. Guille currently directs the Women’s Reproductive Behavioral Health Clinic located within Women’s Health Services in the Department of Obstetrics and Gynecology, where her clinical work with pregnant and postpartum women closely aligns with her research interests. Given the significant morbidity and mortality associated with poor peripartum mental health, and the substantial need for improvement in treatments for this population, Dr. Guille plans to focus her clinical research career centered on women’s health and perinatal psychiatry. One of her long-term goals is to develop evidence-based treatments and practice guidelines for the management of prescription opioid use and misuse, as well as other psychiatric medications during pregnancy.

In addition to her clinical and research roles, Dr. Guille is very active within the national and international perinatal psychiatry community. She is a member of the Postpartum Depression: Action Toward Causes and Treatment (PACT) consortium including 19 international investigators from seven countries. She also serves on an advisory board for the National Network of Depression Centers and the Women and Mood Disorders task group.
Dr. Sheresa Christopher graduated *magna cum laude* from the State University of New York College at Cortland with a Bachelor of Arts in Psychology. She attended Pacific Graduate School of Psychology at Palo Alto University (PAU) where she earned a Forensic Psychology Emphasis Certificate and a Doctor of Philosophy in Clinical Psychology. Dr. Christopher completed her Predoctoral Internship at the University of Massachusetts Medical School/ Worcester Recovery Center and Hospital (Forensic Track). She then completed a Postdoctoral fellowship in Forensic Psychology at East Central Regional Hospital/ Georgia Regents University where she conducted forensic evaluations for the courts.

Dr. Christopher has worked with adults and adolescents through various levels of care including outpatient, residential, intensive residential, acute psychiatric stabilization, and long-term hospitalization in state psychiatric hospitals. Clinically, she is particularly interested in providing evidenced-based psychotherapy to legally involved youth experiencing a range of psychopathology, including the psychological effects of trauma. Dr. Christopher has volunteered as a Child Advocate and has worked to support various organizations including Living Resources and Prevent Child Abuse America. She is licensed as a Clinical Psychologist in the State of South Carolina.

Dr. Christopher is currently working in the Community and Public Safety Psychiatry Division of the Department of Psychiatry and Behavioral Sciences at MUSC. In this role, she primarily conducts forensic evaluations (e.g. competency to stand trial, criminal responsibility, adoption, parental fitness, and child custody) and provides psychological assessment services. She is proficient in several domains of psychological assessment including intelligence, achievement, forensic, psychodiagnostic, and social, emotional, and behavioral functioning. Furthermore, Dr. Christopher provides supervision to fellows in the Forensic Psychiatry Fellowship Program. Research interests include those areas mentioned above (e.g. forensic psychology and psychological trauma).
Jeni Bowers Palmer M.Ed., LPC, CEAP has joined Comprehensive Psychiatric Care Specialists (CPCS). Jeni received a M.Ed. in Clinical Counseling from the Citadel and has been a practicing clinical counselor since 1994. She has provided counseling services to adolescents, adults, couples, families and groups and has worked in a variety of clinical settings specializing in addictions, codependency, co-occurring disorders, eating disorders, relationship issues, stress management and occupational problems. Ms. Palmer is currently the Director the Employee Assistance Program at the Medical University of South Carolina.

Ms. Palmer has a solution focused approach to her counseling style. She is interested in helping her clients meet their stated goals a reach their full potential.
**COMPLIANCE**

The Compliance Office is extraordinarily important to the Department of Psychiatry and Behavioral Sciences. These three individuals may not operate in the “limelight” of the department but their expertise and services have a profound, positive impact on the department’s ability to provide seamless and effective clinical care at all levels of our organization. Mss. Kellie Mendoza, Bonnie Jones, and Karen Mims have the task of bringing to the attention of clinical providers inadequacies in medical record-keeping, coding, and, more importantly, providing ongoing education regarding medical record-keeping and coding policies and requirements. Mss. Mendoza, Jones, and Mims are recognized as true partners in working with all of our clinicians in providing the highest quality of care.

Kellie Mendoza is a Compliance Manager for MUSC Physicians where she manages compliance operations for Anesthesia and Perioperative Medicine, Pathology and Laboratory Medicine, and Psychiatry. She provides provider and staff education and serves as a resource on coding, billing and regulatory issues. Kellie received her Bachelor of Health Science from MUSC in 2010 and is currently enrolled in the Master of Health Administration program at MUSC with an anticipated graduation date of May 2016. Kellie holds a CPC (Certified Professional Coder), which includes an additional certificate for ICD-10 coding, from the American Academy of Professional Coders and a Certification in Healthcare Compliance (CHC) from the Health Care Compliance Association. Kellie has been working at MUSC for almost three years and loves her job because it allows her to build relationships and use her skills to help providers and staff with the ever changing billing rules and regulations.

Bonnie Jones is the outpatient coordinator for Psychiatry’s Medicaid rehab contract. In this role, she audits outpatient medical records that are under the purview of this contract and provides education and training to providers in order to maintain compliance with contract requirements. Bonnie also serves as the Institute of Psychiatry Patient and Family Liaison for outpatient services. To assist her in this role, Bonnie completed the NAMI provider training course. Bonnie supports MUSC Nursing Excellence toward MAGNET accreditation by maintaining her ANCC certification in Psychiatric and Mental Health Nursing. Bonnie graduated from the MUSC College of Nursing and began working at the Institute of Psychiatry in 1990. Prior to her current role, she held several other positions. Her first job here was as a nurse on the inpatient youth unit, 2 North. Following completion of MST training, Bonnie transitioned to working as a nurse in the community with the IOP youth-based COMET program for several years in the mid-1990s. She has also worked as an inpatient admission counselor for the IOP.

Karen Mims, a sixteen year employer of MUSC – Institute of Psychiatry, has a commitment to provide education and serve as a resource on coding documentation, billing and regulatory issues to our trainee outpatient services, including assignment of CPT codes. In 2001 Karen graduated from Trident Technical College. In 2009 she received her certification as a Certified Professional Coder and in 2015 she received her ICD-10 – CM certification from AAPC. Mrs. Mims also works with adults with autism. She proves life skills and supervision and support to meet the needs of each individual. She is also a dance director of Taylor Made Praise Dance Ministry, which is a community based organization. Karen plans to continue her role as a compliance manager, educator and director, as well as further her education in Health Information Management.
This is a time of grief and sadness for our city and our state. The Department of Psychiatry and Behavioral Sciences has organized and made available resources for faculty, staff, residents, interns, families, and friends to support and provide counseling or treatment for the thousands of us affected by this tragedy.

I would like to know of any faculty, staff, resident, or intern who has been affected personally by this tragic event. Please contact my office at uhdepsych@musc.edu if you or a family member has been affected.

While I am largely aware of the extensive services our department formally provided to the victims of the shooting at Charleston’s Emmanuel African Methodist Episcopal Church, it is also highly likely that I am unaware of individual faculty/staff members who, on their own accord, provided counseling or made other contributions. I would greatly appreciate receiving a communication that outlines your contribution. Please don’t be shy in letting me know the ways you provided support in response to this tragedy by sending a message to uhdepsych@musc.edu

YOU’RE INVITED
2015 RESIDENCY GRADUATES

Standing L to R: John Gentry, MD, Bob Brownlee, MD, Mary Blackmon, MD, Will Wright, MD, Nicole Stocking, MD, Kristen Williams, MD, George Hneich, MD & Jessica Samples, MD
Seated L to R: Laura Drewencki & Mandy Roper, MD
Medical Student Teaching Awards

• Psychiatry Golden Apple Award For Outstanding Medical Student Teaching By a Faculty Member Presented to Kelly Barth, DO

• Psychiatry Golden Apple Awards For Outstanding Medical Student Teaching by a Resident presented to Mary Ladd, MD, Michael Sierra, MD & Harsh Soni, MD

• Psychiatry Golden Apple Award For Outstanding Medical Student Didactic Teaching by a faculty member presented to Lee Lewis, MD

• Psychiatry Golden Apple Award For Outstanding Medical Student Didactic Teaching by a resident presented to Thomas Lewis, MD

• Psychiatry Golden Apple Award In Recognition of 20 years of Outstanding Medical Student Didactic Teaching presented to Hugh Myrick, MD

• Psychiatry Golden Apple Awards For Continued Dedication to Excellence in Medical Student Education presented to The Faculty and Staff at the Charleston Community Mental Health Center & presented to The Faculty and Staff at the Dorchester Community Mental Health Center

Psychology Faculty to Interns Awards

• Psychology Internship Program Clinical Excellence Award presented to Renée El-Gabalawy

• John C. Roitzsch Memorial Scientist-Practitioner Award presented to Rachel L. Tomko

• Laura Griffin Humanitarian Award presented by the Class of 1996 to Wilson James Brown

• Robert Magwood, Jr. Outstanding Service to Crime Victims Award presented to Joah Landon Williams, PhD

Psychology Interns Outstanding Clinical Supervisor Awards

• Psychology Internship Program Most Collaborative Supervisor presented to Tatiana Davidson, PhD

• Psychology Internship Program Best Clinical Supervisor presented to Jennifer Correll, PhD

• Psychology Internship Program Teaching Award presented to Carla Kmett Danielson, PhD
Recognition of National Fellowships

- American Psychiatric Association (APA) Diversity Leadership Fellow: Lynneice Bowen
- American Psychiatric Association (APA) Public Psychiatry Fellowship: Daena Peterson
- American Psychiatric Association (APA) Substance Abuse Mental Health Services Administration Minority Fellowship: Annabelle Simpson
- American Psychiatric Association (APA) Resident Psychiatric Research Scholars Fellowship: Zac Zuschlag

J. J. Cleckley Clinical Excellence Awards

The faculty nominated two graduating residents who display consistent clinical excellence. This year’s recipients, Mary Blackmon, MD and Will Wright, MD, will each receive a certificate and a $450 award in memory of former chairman and attending faculty member, Jennings J. Cleckley, M.D.

Laughlin Psychiatric Endowment Fund Award

The Laughlin Family Foundation honors the graduating resident that best exemplifies the important qualities of compassion, leadership and competence. The residents choose the recipient of the award. This year’s recipient is Will Wright, MD. He receives a certificate and a check from the Laughlin Foundation for $1200.

Completing Postdoctoral Fellowships

Addiction Sciences Post-doctoral Fellowship: Bryan Heckman, PhD

Behavioral Medicine Post-doctoral Fellowship: Toni Richardi, PsyD and Lily Christon, PhD

National Crime Victims Research & Treatment Center Post-doctoral Research Fellowship: Christal Badour, PhD, Joseph Cohen, PhD, Lisa Jobe-Shields, PhD, and Joah Williams, PhD
Psychiatry Residents & Fellows to Faculty Awards

- PGY I Outstanding Didactic Teacher of the Year presented to Lee Lewis, MD
- PGY I Clinical Teacher of the Year presented to James B. Fox, MD and Tom Brouette, MD
- PGY 2 Clinical Teacher of the Year presented to Tom Brouette, MD
- PGY 2 Outstanding Didactic Teacher of the Year presented to Angela D. Moreland, PhD
- PGY 3 Outstanding Didactic Teacher of the Year presented to Amy M. VandenBerg, PharmD, BCPP
- PGY 3 & 4 Outstanding Outpatient Charleston Dorchester Community Mental Health Clinical Teacher presented to Michael M. Kassur, MD
- PGY 3 & 4 Outstanding Outpatient Institute of Psychiatry Clinical Teacher presented to Kelly Holes-Lewis, MD
- PGY 3 & 4 Outstanding Outpatient VA Clinical Teacher presented to Elliott E. Levy, MD
- Outstanding Career Mentor for the Class of 2015 presented to Elliott E. Levy, MD
- Outstanding Didactic Teaching in the Child and Adolescent Fellowship presented to Markus Kruesi, MD
- Outstanding Clinical Training in the Child and Adolescent Fellowship presented to James E. Edwards, MD

Psychology Program Graduates

Malene Abell, BS  Renée Marie El-Gabalawy, MA
Cassidy C. Arnold, MS  Marie E. Karlsson, MA
Kaitlin Bountress, MA  Stephanie Marie Keller, MA
Stephen Boyd, MA  Kristina J. Korte, MS
Dana Lynn Beall Brown, MA  Ellen Meier, MS
Wilson James Brown, MA  Isha Walwina Metzger, MA
Brian E. Bunnell, MS  Regan W. Stewart, MA
Brittany Lynn Collins, MS  Rachel L. Tomko, MA
Daniel Dewey, MA  Bridgette Lynne Tonnsen, MA
Jennifer E.P. Dunbar, MS  Allison K. Wilkerson, MEd
Completing Internship in the Psychiatry Residency Program

William H. Bingham, III, MD
Lynneice L. Bowen, MD, M. Ed
Joshua C. Brown, MD, PhD (Neuro-Psych)
Kelly A. Campbell, MD, MPH
Joseph C. Cheng, MD, PhD
Leon E. Cushenberry, Jr., MD
Leah Fryml, MD
Natasha Juneja, MD

Alyssa M. Kennedy, MD

Michael A. Sierra, MD
Allison J. Smith, MD (Med-Psych)
Robert Blake Werner, Jr., MD
Alton C. Williams, III, MD
Jared J. Woodward, DO

Psychiatry Residency Program Graduates

General Psychiatry:
Mary Blackmon, MD, Chief Resident
Laura Drewencki, MD
John Gentry, MD, Chief Resident
Georges Hneich, MD
Amanda Roper, MD *(DART grad)*
Nicole Stocking, MD
William Wright, MD, Chief Resident

Combined Internal Medicine-Psychiatry:
Robert Brownlee, MD
Jessica Samples, MD, Med Psych Chief
Kristen Williams, MD

Completing General Program Requirements
within Child Fellowship
Kiana Andrews, MD
Tracy Grabman, MD
Ben Potter, MD
Stephanie Price, DO
Maggie Wilkes, MD
Completing Fellowships

**Brain Stimulation Fellowship**
Greg Sahlem, MD

**Child & Adolescent Psychiatry Fellowship**
Nick Evangelidis, MD
Whitney Fulton, MD
Sarah Kuhn, MD, Chief Resident
Adrienne Langlinais, MD, Chief Resident
Amanda Roten, MD

**Forensic Psychiatry Fellowship**
Hosain Manesh, MD
Joshua Pagano, DO
As the Charleston community and the Nation respond to last week’s tragedy in a beautiful way, I wanted to pass along an invitation for you and your family to help the victims’ families. Byron Maxwell, NFL star and one of Charleston’s favorite sons, is hosting a charity bowling event this Saturday, June 27th from 11am to 6pm. Admission is just $5, which includes food and unlimited bowling. The event will also be attended by NFL players, including Roddy White, Frank Gore, Malcolm Jenkins, Brandon Boykin, and Robert Quinn. There will be a silent auction of some really great items. All proceeds will go to the families of the victims of the Charleston “Mother” Emanuel AME Church shooting.

As many of you know, Byron is the son of Elaine Brown, who is a longtime employee of the Department of Psychiatry & Behavioral Sciences/Institute of Psychiatry. This event is a wonderful way to show support for the victims and their families from our MUSC family.

Location:
Ashley Lanes
1568 Sam Rittenberg Blvd
Charleston SC, 29407
11AM-6PM
Admission: $5

byronmaxwellfoundation.org
PROMOTION PACKETS
For anyone who is requesting promotion effective July 1, 2016, all promotion requests must be received in the Chairman’s office no later than August 3, 2015, in the form of complete packets accompanied by a letter of recommendation from your Division Director. Packets with checklists, requests for materials, and forms specific for regular and modified faculty have been developed to make the submission process more straightforward. Packets are available on the College of Medicine’s website. Follow this link: http://academicdepartments.musc.edu/com/faculty/apt/musc/index.html. The letter of recommendation from your Division Director must follow appendix 2 in the COM APT guidelines. Division Director letters should include the following paragraphs: introductory, education, research if applicable, scholarly publications, clinical practice if applicable, administration, and other activities and accomplishments. If you have any questions, please contact Kristen Mulholland mulhollk@musc.edu.

FACULTY MEETING
The next Faculty meeting will be held on Tuesday, July 21, 2015, from 12-1pm in the IOP auditorium. All are encouraged to attend.

TOWN ALL
Please join us Monday, July 20, 2015, for our Town ALL from 2-3pm in the IOP auditorium. Dr. Matt Carpenter will be giving a brief presentation on smoking. Feel free to email your questions that you want addressed prior to the next Town ALL to psychall@musc.edu. If you are unable to join us live, we are now streaming Town ALLs at https://connect.musc.edu/psychiatry.
The Clinical Neurobiology Laboratory was inspected by a team certified by the College of American Pathology this week. This review, which occurs every two years in conjunction with the MUHA lab inspection, was extremely positive and the lab received solid passing grade. The inspector noted that the lab was remarkably well run. He went on to state that it was clear that the CNL produced the highest quality work with exemplary control and proficiency testing oversight. The lab looks forward to receiving a renewed CAP/CLIA certificate in the near future. Dr. Anton and the Department want to thank the lab staff (Lorie Blakely, Dreema Murray, Scarlet Ryan and Yeongbin Im), but in particular Emily Leonard, for their hard work and dedication to the inspection process. More than that, it is the commitment to the highest lab performance and service evident every day of the year that is reflected in the quality that inspectors have recognized both this year and over the past 20 years. If you have any questions about how our the CNL (Our Department Laboratory) can service your clinical or research sample testing needs don’t hesitate to contact Dr. Anton or Ms. Emily Leonard (x5440).
We are currently ranked 8th in the country in terms of NIH funding. We are growing and with increased numbers of faculty members and associated staff, one of our major challenges is the location of space. Our clinical enterprises are also expanding in number of clinicians and patient volume.

We will soon be requesting Division Directors to provide a self-examination of the potential advantages/disadvantages of relocating some or all of their operations off campus. Another question to be addressed by the Division Directors is whether or not faculty and/or staff could perform their duties on an at-home work basis.

These queries are exploratory only and there are no current plans to move any new operations off campus. We are simply attempting to explore possible options for the future as we continue to grow and expand.

---

**Please join us for a**

**Comings and Goings celebration**

Please join us as we recognize new faculty and employees and say farewell to those leaving us.

June 30, 2015
Institute of Psychiatry Lobby
11:30am-12:30pm
desserts and refreshments will be served
Small Group Preceptors needed for COM Year 1 Fundamentals of Patient Care (FPC) Course:
Interested in shaping the future of medicine? Enjoy working with medical students? Need teaching experience for promotion or future job experience? FPC may be the opportunity for you! We are looking for psychiatry faculty, residents, or postdoctoral fellows to serve as small group preceptors for medical student’s Year 1 Fundamentals of Patient Care course. FPC is a year-long theme within the integrated curriculum of the COM’s preclinical years. The theme covers topics and skills related to medical interviewing, physical diagnosis, behavioral science, professionalism and career planning. In addition to lectures, workshops, and simulation center activities, student participate in a 2 hour per week (with a number of weeks off during the semesters) small group seminar experience. Each small group is co-facilitated by two preceptors. Consider serving as a preceptor! You are provided the syllabus, course material, weekly agendas, and all other relevant teaching materials. For more information, contact Dr. Alyssa Rheingold at rheingaa@musc.edu

Small Group Ethics Preceptors needed for COM Years 2, 3 & 4 Fundamentals of Patient Care (FPC) Course:
The Department of Psychiatry & behavioral Sciences is looking for interested faculty and residents to serve as small group ethics preceptors. Being an ethics small group preceptor offers you the opportunity to work with a group of students from their second year of medical school until they graduate. The ethics small groups require a three hour obligation six times a year (total 18 hours/year) and you will be working with a co-preceptor. These sessions focus on building our students’ ability to reflect and process ethical dilemmas that arise in clinical and research settings. In the MS 2 year, the students have preassigned readings and discuss ethical and public health issues involved in a clinical case the students discussed in another part of the curriculum. The preceptor role is to facilitate the theoretical and real world applications of the ethical principles they reviewed in their readings. As these students advance in their education preceptors have the opportunity to continue to meet with the same group of students in their third and fourth years of medical school. The discussions during the clinical years center on cases or difficult situations the students have encountered. If you are interested in being part of this educational journey please contact Dr. Tom Brouette at Brouette@musc.edu
The Department of Psychiatry and Behavioral Sciences at the Medical University of South Carolina (MUSC) invites applications for a tenure track faculty position in the area of Translational Neuroimaging Science. Applicants for the MUSC Endowed Chair of Translational Neuroimaging Science should be trained in a neuroscience field (including but not limited to psychiatry, psychology, neurobiology, audiology, otorhinolaryngology, behavioral neuroscience, neurology, neurosurgery, neuroradiology). They should have a record of externally funded research. Prior evidence of mentoring junior researchers, and scholarship, particularly activity that spawns new industries, would be highly prized. This position is part of the SmartState Endowed Chairs program. The successful candidate would be expected to perform their own imaging related science, and would provide scientific leadership including the grooming of junior researchers and generating pilot data. They will be expected to participate in research projects throughout the BICOEE (at both USC and MUSC) to maximize their cognitive and behavioral sophistication.

The candidate will provide psychiatric medical evaluation to patients via telePsychiatry services to include penitentiaries, county detention centers, and other clinical service areas. The candidate may also be involved in providing in-person psychiatric evaluations and medication management services to patients.

Candidate will be an MD who has completed a Forensic Psychiatry Fellowship and is able to hold an unrestricted medical license in South Carolina. Candidate will be the lead MD on forensic cases from private law firms, State agencies and/or doing private competency evaluations. Candidate will also be part of the clinical team to provide TelePsychiatry services to the SC Department of Corrections as well as in- person evaluations of prisoners at correctional facilities.

Candidate must be an MD with an unrestricted license to practice in the State of South Carolina. The candidate will be responsible to managing an inpatient psychiatric unit at Regional Medical Center (Orangeburg). Candidate will be responsible for daily rounding, admissions, discharges and working with medical staff in the other unites and emergency department.
CURRENT JOB POSTINGS

https://www.jobs.musc.edu/

#070308 MSD Open MD position (Professor)
Candidate(s) will provide clinical services to the department and/or provide support on funded research projects.

#070313 MSD Open MD position (Clinical Associate Professor)
Candidate(s) will provide clinical services to the department and/or provide support on funded research projects.

#070343 CPSPD Open MD Outpatient position (Assistant Professor)
Candidate must be an MD/DO eligible for licensure to practice in South Carolina, being board-eligible or board-certified in Child and Adolescent Psychiatry is a plus. Candidate will be responsible seeing patients on an outpatient basis as part of a treatment team (MD, Social Workers, etc), be open to doing telePsychiatry, as well as other clinical duties. Candidate will also be involved in resident/fellow/medical student education and other academic activities.
