The MOMRP’s Research Funding Opportunities and Links

The U.S. Army Medical Research and Materiel Command (USAMRMC) Military Operational Medicine Research Program (MOMRP) conducts medical research to deliver products and solutions to Service Members and families that address health and fitness throughout the military lifecycle. The focus is on solutions that minimize the health effects of operational and environmental stressors and enhance Service Member readiness and performance. The MOMRP manages research funding on behalf of the Department of the Army and the DoD Defense Health Program (DHP). This funding supports research at DoD laboratories and myriad extramural research organizations from small colleges to multi-national corporations in the development of innovative technology. The research products are directly applicable to today’s military challenges and the anticipated problems of future operations in garrison, training and deployed environments.

USAMRMC BAA #W81XWH18SBAA1 www.usamraa.army.mil/Pages/BAA.aspx
The Broad Agency Announcement (BAA) is a competitive solicitation procedure intended to solicit extramural research and development ideas. It is issued under the provisions of the Competition in Contracting Act (CICA) of 1984 (Public Law 98-369),* as implemented in Federal Acquisition Regulation (FAR) 6.102(d)(2) and 35.016 and in DoD Grant and Agreement Regulations (DoDGAR) 22.315. The USAMRMC BAA provides a general description of the USAMRMC’s research and development programs, including: research areas of interest; general information; evaluation and selection criteria; and proposal/application preparation instructions. Research funded through the USAMRMC BAA is intended and expected to benefit and inform both military and civilian medical practice and knowledge. Research proposals/applications are sought from national, international, for-profit, non-profit, public, and private organizations. The USAMRMC BAA is a continuously open announcement; pre-proposals/pre-applications and proposals/applications may be submitted at any time throughout the 5-year period. The USAMRMC BAA #W81XWH18SBAA1 contains several changes from previous USAMRMC BAAs. Please read each section carefully.

Grants.Gov www.grants.gov/index.jsp
Grants.gov is your source to find and apply for federal grants. The US Department of Health and Human Services is the managing partner for this website. Grants.gov was established as a governmental resource named the E-Grants Initiative, part of the President's 2002 Fiscal Year Management Agenda to improve government services to the public. To search military grants, click on “Grant Search” under “For Applicants.” On the “Basic Research” page, use the following CFDA number: 12.420 to search.

USAMRMC MOMRP E-List Registration momrp.amedd.army.mil/MOMRP_HTTP/Listserv/
Register with our E-list service to receive notification of funding opportunities as they become available. Research area topics include post-traumatic stress disorder (PTSD), suicide prevention, alcohol and other drug use, pain management, family separation and bereavement, resilience and recovery.

Federal Business Opportunities (FEDBIZOPPS) www.fbo.gov
FedBizOpps.gov is a web-based system for posting solicitations and other procurement-related documents, such as Small Business Innovation Research (SBIRs) and Small Business Technology Transfer (STTRs). FedBizOpps was designated by the Federal Acquisition Regulation as the mandatory “government wide point of entry for the posting government business opportunities greater than $25,000.” The website allows contract specialists to post synopses and other procurement documents (solicitations, amendments, and award notifications) to a common index. This index allows vendors to search databases containing information from many federal agencies. Vendors may also subscribe to receive daily email notifications of requirements and procurement announcements sorted by selected organizations and product service classifications, or by solicitation number.

Defense Health Agency (DHA) Research, Development and Acquisition Directorate (RDA)
www.health.mil/Military-Health-Topics/Research-and-Innovation/Medical-Research-and-Development
The Defense Health Agency (DHA) Research, Development and Acquisition Directorate (RDA) mission is to implement best practices to responsibly design, prioritize and integrate medical research, development and acquisition programs across the continuum of care. By fostering strategic partnerships and transitioning medical discoveries to deployable products, RDA enhances the readiness and resilience of the military community.
