As the use of e-cigarettes grows, so does the debate over as to how these new devices fit within tobacco control. Some say it’s a gateway to smoking, with 16 percent of high school students using e-cigs in 2015, an eight-fold increase from 2011. On the other hand, studies suggest that e-cigs can help adult smokers quit. Join researcher Dr. Matthew Carpenter as he sorts out fact from fiction on both sides of this debate.
