

ABSTRACT
#11-004

The South Carolina Spinal Cord Injury Research Fund (SCIRF) Board of Directors decided upon the need for the SCIRF to evaluate its current and original approach in planning. This endeavor will acquire a useful operational and strategic plan to determine the best use of the SCIRF's resources after 10 years of service while recognizing that the environment has changed over the ten years. The Executive Committee of the Board will identify and retain a consultant to review the strategic and operational issues of the SCIRF.
