REQUEST FOR PROPOSALS (RFP)

STUDENT RESEARCH INTERNSHIP

ISSUED BY THE SPINAL CORD INJURY RESEARCH FUND
ADMINISTERED BY THE MEDICAL UNIVERSITY OF SOUTH CAROLINA (MUSC)

RFP 2016 - S

Date of Release: September 25, 2015
Deadline for Submission: Open

Background: Amendment (Bill S54 44-38-510) to Section 2, Chapter 38, Title 44 of the 1976 SC Code was ratified on July 20, 2000 and authorized the new South Carolina Spinal Cord Injury Research Fund (SCIRF) provided from a $100 surcharge on each Driving Under the Influence (DUI) conviction. The SCIRF is administered by the SCIRF Board appointed by the Governor and is attached to MUSC for staff and administrative purposes. The law authorizes the SCIRF to utilize monies to cover basic operating and administrative costs but directed that the balance be provided for spinal cord injury (SCI) research projects.

SCI is a serious cause of disability, results in an increased lifelong risk of secondary health conditions, and is typically associated with elevated risk of mortality. Often traumatic in origin, it may also result from inflammatory, neoplastic, developmental, or rarely infectious causes. The consequences of SCI are legion, including paralysis of legs and arms, even muscles of respiration; loss of sensation and autonomic control; chronic pain; impairment of bowel, bladder, and sexual function; metabolic disorders, such as hypercalcemia; muscle spasticity with contractures of joints, fractures, and heterotopic ossification; complications such as decubitus ulcers, uncontrolled blood pressure, and frequent infections. People with SCI may face extraordinary demands due to the costs of medical care, limitations in rehabilitation resources after profound loss of mobility, and the absence of environmental supports. The families of people with SCI also face additional demands, and the costs of care to families and the residents of South Carolina are extraordinary and ongoing. The long-term goal of this research initiative is to minimize the risk and incidence of SCI, interrupt or reverse the process of SCI, and improve the health and quality of life for residents of South Carolina with SCI.

Areas of potential research interest include: basic neurobiology, including regeneration of cells and axons, modulation of inflammatory and destructive processes, prevention of injury-induced neurotoxicity or secondary injury; pre-clinical studies, including refinement of animal models of SCI; translation of pre-clinical findings into treatment, including pharmacological trials, surgical approaches, and previously unexplored treatments; clinical issues, including diagnostic assessment and monitoring, relationship to other spinal cord disorders and psychological disorders; outcomes of rehabilitation, including therapies (prosthetic, physical, occupational, speech/language, recreational), secondary health conditions, quality of life (technological solutions, functional improvement), and attendant care; epidemiology, including factors affecting incidence, availability, and quality of SCI care in South Carolina; education and prevention, including education curriculum for people and families in appropriate and adequate SCI care (classroom, career), community (prevention of alcohol-related injury, opportunities for therapy and rehabilitation), and health care providers (curriculum at South Carolina colleges and universities, professional education).

Request for Proposals: The SCIRF invites applications from established investigators for Student Research Internship grants for students in medicine, nursing, health professions, epidemiology, neuroscience or other related fields that apply to basic, clinical, or translational research with SCI and spinal cord injury/disease.
Funding Mechanism: Student Research Internship Grants

Student Research Internship grants will not exceed $10,000 over a 12-month period. The primary goal of this grant will be to provide established investigators in basic or applied sciences, with the opportunity to provide mentorship to individuals who are currently in an educational program, with the goal of enhancing the number of students who develop skills in research with SCI.

Eligibility and Terms of Support: Student Research Internship grant applications will be accepted from investigators in South Carolina who have a terminal professional degree in their field and, in the case of research involving human subjects, have access to an Institutional Review Board. This includes, but is not limited to, faculty members of research and educational institutions throughout the state.

Reporting/Presentations: A Final Report is due within 60 days after termination of the grant. All reports should be submitted to the Executive Director. In addition, all applicants may be required to present their research/findings at a SCIRF meeting and/or Scientific Conference.

Funding: Student Research Internship grants will provide stipends and associated expenses not to exceed $10,000 over a 12 month period. The grant includes up to $5,000 for the student and up to $5,000 for the mentor/PI. The SCIRF does not provide support for indirect costs, and any such related costs essential to the proposed research should be included in the direct cost budget request.

Timeframes: This mechanism is open, so there is no specific deadline. The review of all Student Research Internship proposals will be completed within 60 days following the grant submission. The SCIRF will make money available within 30 days following approval from the Board of Directors and receipt of signed acceptance forms from successful applicants.

Review Process: Student Research Internship grant proposals will be reviewed by the SCIRF Scientific Directors. The SCIRF Board of Directors will consider these reviews in making all final award decisions.

Submission Address: Grant applications should be submitted in PDF form by e-mail to the SCIRF Executive Director.

Application Format: The proposal must not exceed 5 pages, not including the Face Page, Abstract or the vita/biosketch of the mentor. The suggested application format follows:

I. Face page
II. Abstract
III. Background and approach of the project:
   A. Background and qualifications of the mentor
   B. Overview of the research program
   C. Types of student sought
   D. Detailed description of the plan for mentorship/oversight
   E. Description of the resources at the applicant institution
III. Value to the State of South Carolina
IV. Budget (with narrative justification)
V. Biosketch of mentor– abridged NIH format

Number of Awards: The SCIRF anticipates making up to 4 Student Research Internship awards per year.
**Awarding of Funds:** Projects will be awarded by grant or contract based upon applicable South Carolina policies, procedures, and laws concerning the expenditure of State funds. Grants or contracts are made to the mentor’s institution, not to any individual or principal investigator.

**For Questions or Additional Information:** Potential applicants should contact Ms. Catherine Leigh Graham, Executive Director, South Carolina Spinal Cord Injury Research Fund. Questions regarding applied or clinical research should be addressed to Dr. James Krause, Scientific Director, South Carolina Spinal Cord Injury Research Fund. Basic science questions should be addressed to Dr. Naren Banik, Associate Scientific Director, South Carolina Spinal Cord Injury Research Fund.
