CITI MIAMI log in will **change effective August 31, 2009.** MUSC and CITI MIAMI have collaborated to institute a more secure and efficient log in system to CITI that will eliminate the need to create a new username and password combination for access to the CITI training.

Under the new system, all users, whether first time or previously registered, will access CITI MIAMI by using their current MUSC issued NetId and password. The link to CITI MIAMI will be located at http://www.musc.edu/citi. When the CITI MIAMI link (located at the top of the page) is selected, a gray box will open up asking for your NetID and password. Once entered, you will be directed to your CITI MIAMI main homepage.

For Non-MUSC users wishing to take the training, they will need to complete the OCIO Non-MUSC application for a NetID. **This procedure requires the Non-MUSC individual to be sponsored by an MUSC employee.** The sponsor will need to contact the appropriate “registration authority” (Registration authorities: http://www.musc.edu/infoservices/idam/contacts.html) to provision and deliver the NetId.

MUSC and CITI MIAMI have worked diligently to match current users with their NetIds allowing instant access to their old records. More information is available at http://academicdepartments.musc.edu/citi/. If you experience any issues or have any questions, please contact:
