GENERAL M/E/P AND COORDINATION NOTES

1. Disconnect and remove all rooftop mechanical and electrical equipment as necessary to complete the work and permanent gauge completion of work. Provide for expansion of all connections necessary to accommodate new views and locations.

2. Any changes, new equipment, and connections shall be designed and coordinated with the electrical contractor. These include rooftop equipment, electrical connections, and any new equipment.

3. Extends/receives all penetrations, curbs, mechanical electrical and plumbing components to be terminated at the finished rooftop surface.

4. In a manner consistent with all penetrations, shall extend the following: all penetrations and/or terminations.

5. Use round aoSSIP equipment supports and shall not be used to extend Bx.

6. Install new AoSSIP covers, conduit units with AoSSIP screws, and cures.

7. Any locations/connections where the above requirements cannot be met shall be noted in the attention of the roof contractor/owner/tenant.

DESTRUCTION NOTES

1. Prior to performing work, contractor shall protect deck surfaces and structural elements, provide for the safety and protection of workers and equipment, and remove all waste materials from the area. The work shall be performed in accordance with the requirements set forth in this contract.

2. The contractor shall ensure that the rooftop deck is protected during the work. The contractor shall be responsible for the safety and protection of workers and equipment.

3. All work shall be performed in a manner that will not damage the finished rooftop surface. The contractor shall ensure that all materials are removed from the area in a timely manner.

4. The contractor shall be responsible for any damage to the finished rooftop surface caused by the work.

5. The contractor shall be responsible for ensuring that all waste materials are removed from the area in a timely manner.

CONSTRUCTION NOTES

1. The contractor shall be responsible for ensuring that all materials are installed in accordance with the specifications and drawings.

2. The contractor shall provide for the safety and protection of workers and equipment during the work.

3. The contractor shall be responsible for the removal of all waste materials from the area.

4. The contractor shall be responsible for ensuring that all finished surfaces are protected during the work.

5. The contractor shall be responsible for any damage to the finished surfaces caused by the work.

6. The contractor shall be responsible for ensuring that all waste materials are removed from the area in a timely manner.

7. The contractor shall be responsible for any damage to the finished surfaces caused by the work.

PROTECTION NOTES

1. The contractor shall be responsible for the removal of all waste materials from the area in a timely manner.

2. The contractor shall be responsible for ensuring that all finished surfaces are protected during the work.

3. The contractor shall be responsible for any damage to the finished surfaces caused by the work.

4. The contractor shall be responsible for ensuring that all waste materials are removed from the area in a timely manner.

5. The contractor shall be responsible for any damage to the finished surfaces caused by the work.

6. The contractor shall be responsible for ensuring that all waste materials are removed from the area in a timely manner.
CORE SAMPLE SUMMARY

A. CORE SAMPLE SUMMARIES ARE PROVIDED AS GENERAL INFORMATION ONLY. IT IS THE CONTRACTOR'S SOLE RESPONSIBILITY TO COLLECT THE NECESSARY FIELD DATA TO PREPARE THEIR BID.

B. LOCATIONS OF THOSE CORES ARE SHOWN ON THE EXISTING ROOF PLAN.

TAPERED INSULATION NOTES

1. As noted in section of 23.00 roof insulation, the primary slope for insulated roof areas shall be provided with tapered insulation.

2. Secondary slope (crickets) shall provide a minimum 3:12 or 24° slope.

3. Secondary slope (crickets) shall provide a finished slope of not less than 1:12.

4. Back slopes shall be on the primary slope.

5. All penetrations/terminations shall be tapered to provide minimum 6" base flashing detail.

6. Insulation thicknesses shall be coordinated with and match underlayment thickness and adjacent insulation thicknesses within a 2" tolerance in all directions.

7. Provide a tapered cricket on the high side of all non-round penetrations wider than 24".
