APPENDIX F

REQUIREMENTS FOR USE OF MODEL M GAMMATORS
REQUIREMENTS FOR REQUESTING USE OF GAMMA IRRADIATORS

Individuals who need to purchase gamma irradiators must contact the Radiation Safety Office prior to initiating any procurement forms. Radiation Safety will need the model, type, equipment and training specifications, and proposed manufacturer of such equipment to submit (in writing) to the State Bureau of Radiological Health for approval. An investigator must also complete an application for use (see Appendix C) of the equipment. MUSC Engineering and Facilities must also be contacted regarding location of the equipment.

Individuals who request use of gamma irradiators must be fully trained by the Investigator who is licensed for such equipment.
