## Chapter I Administration and Procedures

1. Radiation Safety Officer                                             1
2. Radiation Control Council                                             3
3. Radiation Usage Committee                                             3
4. Procedures for Training of Personnel                                  3
5. Procedure for Obtaining Authorization                                 4
6. Procedure for Transfer of Radioactive Material(s) from/to Outside Institutions 6
7. Procurement of Radioactive Materials                                   7
8. Procedure for Receiving Radioactive Materials                         8
9. Procurement of Electronic Devices Capable of Producing X Radiation     9
10. Radiation Survey of Electronic Equipment                             9
11. Non-Ionizing Radiation Guidelines                                    9
12. Airborne Ultrasound Guidelines                                       10
13. Laser Radiation Guidelines                                           11

## Chapter II Diagnostic Use of Radionuclides

1. Director of the Nuclear Medicine Laboratory                          13
2. Training of Nuclear Medicine Personnel                               13
3. Procurement of Radionuclides                                         13
4. Storage of Radionuclides                                             14
5. Obtaining Radionuclide Procedures for Patients                       14
6. Nuclear Pharmacy of Charleston                                       15
7. Director of the Nuclear Pharmacy of Charleston                        15
8. Verification of Recipients of Radiopharmaceutical Transfers          15
9. Transportation of Radioactive Drugs                                  15
10. Procedures for Shielding, Labeling, and Transportation of Radioactive Drugs 16
11. Verification of Prescription Orders for Radioactive Drugs           16
12. Procedures and Practices for Administration of Radiopharmaceuticals to Patients 18
    A. General Procedure                                                 18
    B. Diagnostic Doses                                                  18
    C. General Principals of Protection                                  19
    D. Nursing Care of Patients                                          19
    E. Control of Patient Excreta                                        19
    F. Control of Patients and Visitors                                  20
    G. Radioactive Waste Disposal                                        20
    H. Caution Signs and Labels                                          21
    I. Personnel Monitoring                                              21
J. Other Safety Requirements for Personnel

K. Records

L. Misadministration

M. Surface Contamination Control

13. Emergency

Chapter III Diagnostic Use of Radiation Equipment

1. Procedure for Obtaining Authorization - Human Use

2. Procedure for Obtaining Authorization - Non-Human Use

3. Dental Radiographic Procedures

4. Responsibilities of the Principal Investigator

5. Personnel Monitoring

6. Requirements for Caution Signs and Labels

7. Other Personnel Safety Requirements

8. Radiation Surveys

9. Diagnostic Non-Ionizing Equipment

Chapter IV Therapeutic Uses of Radiation

1. Procedure for Obtaining Authorization

2. Responsibilities of the Principal Investigator

3. Personnel Monitoring

4. Requirements for Caution Signs and Labels

5. Other Personnel Safety Requirements

6. Leak Testing

7. Radiation Surveys

8. Radiation Calibrations

9. Radiation Sources

10. Cesium

11. Strontium-90 Beta Ray Eye Applicator

12. Internally Administered Radionuclides

13. Emergency

Chapter V Non-Human Use of Radionuclides

1. Procedures for Obtaining Authorization

2. Responsibilities of the Principal Investigator

3. Training of Laboratory Personnel

4. Procurement of Radioactive Materials

5. Personnel Monitoring

6. Bioassays

7. Laboratory Monitoring

8. Surface Contamination Control

9. Special Protective Equipment

10. Transfer of Radioactive Materials

11. General Laboratory Procedures

12. Radioactive Waste Disposal

13. Requirements for Caution Signs and Labels

14. Record Keeping

15. Use of Radionuclide Irradiators

16. Emergency
Appendix A: Instructions to Personnel for Human Use of Radiation
Appendix B: Instructions and Sample Application Forms for Authorization
Appendix C: Forms
Appendix D: Decontamination Procedures
Appendix E: Recommendations for Educational Requirements for Dental Radiology Personnel
Appendix F: Requirements for Use of Model M Gammator
Appendix G: Maximum Permissible Doses
Appendix H: Notices, Instructions, Reports to Workers and Emergency Numbers
Appendix I: Policies and Procedures Nuclear Medicine
Appendix J: Policies and Procedures Nuclear Pharmacy
Appendix K: Policies and Procedures Radiation Oncology
