2017 Dialectical Behavior Therapy Summer Series

Join us on the third Friday of each month during the months of June, July, August and September for an opportunity to dive deeper into Dialectical Behavior Therapy (DBT) and earn up to 16.0 CEU credits. DBT is an effective, broad-based cognitive behavioral treatment shown by extensive research to be useful for patients with many disorders involving emotional dysregulation and interpersonal difficulties. DBT is comprised of multiple sets of skills and strategies, and this summer workshop series will provide clinicians with advanced knowledge and application of four components of DBT including: (1) suicide risk assessment and phone coaching for suicidal behavior; (2) biosocial model and pre-treatment strategies; (3) chain analysis and contingency management; (4) and dialectical strategies. Participants will leave with the practical knowledge to directly implement in their practice. There will be opportunities to observe role play examples as well as to practice skills.

**SESSION DATES + TOPICS**

Session I: Suicide Risk Assessment and Phone Coaching for Suicidal Behavior - June 16, 2017
Session II: Biosocial Model and Pre-Treatment Strategies - July 21, 2017
Session III: Chain Analysis and Contingency Management - August 18, 2017
Session IV: Dialectical Strategies - September 15, 2017

**SERIES FACULTY:**
